

**DIFFUTHERM**

**NEW**

**DIPRO 620**

## **ECO-SHIELD TRANSIT**

**The biodegradable, removable, water-based wax solution for overseas transport and outdoor storage**

**Reliable corrosion protection for metal parts, machinery and tools. Bio-based, low-hazard, and removable with hot water only.**

-  Based on biological raw materials
-  Removable with hot water and pressure spray
-  Dischargeable via sewage system
-  Up to 6 months corrosion protection
-  UV- & saltwater resistant
-  Minimal hazard labels required

## DIPRO 620

### Patent pending high-end transport corrosion protection

#### For sea freight, outdoor storage & valuable machinery

DIPRO 620 is a high-end, patent pending corrosion protection solution designed for demanding transport and storage conditions. It offers reliable protection against corrosion, UV radiation, saltwater, and moisture – all in a sustainable, eco-friendly formula.

Unlike traditional corrosion protectants, DIPRO 620 is based on biological raw materials, requires almost no hazard-labelling, and is easily removed with hot water only. The wastewater can be discharged directly into the sewage system – saving time, cost, and protecting the environment.

#### APPLICATIONS

- Machines and tools stored outdoors
- Components, assemblies, vehicles and spare parts in overseas sea freight
- High-value or precision metal parts
- Industrial equipment during storage or logistics
- Temporary corrosion protection for exposed surfaces
- Easy application by spray gun, airless or airmix

#### PACKAGING UNITS

- 5 L, 10 L, 20 L and 60 L buckets
- 200 L drum
- 1,000 L IBC
